The Chemical Constitution of the Proteins | Journal of ... The nitrogenous substances or albuminoids, of which animal tissues for the most part consist, and which are also found in the seeds, leaves and other parts of plants, were originally believed to be composed of one and the same organic substance called protein by Mulder about a century ago (from Mulder's first paper).

The Chemical Constitution of the Proteins - Forgotten Books A conception of the composition of a complex substance must precede its synthesis. Mulder's supposition that albumin, fibrin, caseinogen and other similar substances were combinations of a hypothetical radicle, which he termed protein, with sulphur and phosphorus in various proportions, was.
