Know Where Your Heart Is and How to Identify Heart Pain ... It might be a shocker for some of you, but hearts isn't really located on the left side of your chest. It lies between the right and left lungs, in the middle of the chest and slightly towards the left of the breastbone. The heart is enclosed in the pericardium which is a double layer. Where is Your Heart Located? Chest Pains Related with Your ... Place your right palm in the middle of your chest. Move your hand a bit to the left, and that's the exact location of your heart. With a size of your fist, it is located in front of the spine and between your lungs. Your heart is secured inside the chest by the rib cage. You may feel sudden pressure or pain in the exact location of your heart. You may also experience pain in other areas near the heart. How your heart works - Heart and circulatory system ... The de-oxygenated blood then travels back to the heart through your veins which lead back to the right side of your heart. Like every other living tissue, the heart needs a constant supply of blood. This comes from the coronary arteries which branch off from the main artery (aorta) as it leaves the heart.

What's your heart age? - use this tool before your Health ... What's your heart age? We've teamed up with NHS Choices to bring you a new way to check your risk of having a heart attack or stroke. If you're 40 or over you can use this tool before your NHS Health Check to get an idea of what your results might show. 30-40 year olds can use it too. 5 Signs Your Heart is Healing After a Breakup - She Blossoms Take heart, for you may be healthier and happier than you think - even though you're still searching for breakup advice because your heart is broken! These five signs of healing after a breakup will give you hope and encouragement to keep moving forward. Your Heart & Circulatory System - Kids Health Your heart is sort of like a pump, or two pumps in one. The right side of your heart receives blood from the body and pumps it to the lungs. The left side of the heart does the exact opposite: It receives blood from the lungs and pumps it out to the body.
